IDS Working Group
2008-02-28 Conference Call Minutes

1. <u>Attendees</u>

Attendees: Lee Farrell (Canon), Rick Landau (Dell), Ira McDonald (High North), Dave Whitehead (Lexmark), Ron Bergman (Ricoh), Brian Smithson (Ricoh), Joe Murdock (Sharp)

2. <u>Identify Minutes Taker</u>

Lee Farrell

3. <u>Accept Previous Minutes</u>

There were no objections to the previous Minutes.

4. <u>Review Action Items</u>

> ACTION: Everyone will submit links or documents to the e-mail list for relevant information about this project.

→ *Jerry has provided links to the Cisco NAC documentation.* **CLOSED**

During the discussion of the above item, the following two new Action Items were generated:

> ACTION: Ron Bergman will re-send a previous e-mail that identifies links to some relevant Microsoft and TNC documents.

> ACTION: Lee Farrell will send links to the IETF NEA documents.

> ACTION: Everyone will tabulate the attributes and attribute differences between the target security protocols.

→ **OPEN**

Ron noted that we need to distill a "nice, complete list" of all the attributes of the various target security protocols.

Ira referenced the CISCO NAC Framework Configuration Guide, saying that one of the Appendices contains a good list of attribute information.

> ACTION: Everyone will identify the overlap of currently defined device attributes with those that apply to HCDs.

→ **OPEN**

5. <u>New discussion</u>

There was no specific progress to report.

Joe, Ron, and Ira all volunteered to look at the documents more closely, and report their findings to the group. All members are encouraged to examine the documents as well.

6. <u>Next Teleconference</u>

It was noted that a few of the members will have a conflict on Mar 13—because of a P2600 meeting. The group decided to skip that date and hold the next teleconference on Mar 27, 1:00pm EST.
