### 1.1.4 IPP/2.0 LCRC Review and Approval

Ira led a review of the IPPv2.0 specification, and highlighted the latest modifications that address the Last Call comments. He noted that the Terminology section had been re-written.

The updates were accepted as written, and there were no significant comments regarding the changes.

Ira requested that the Steering Committee begin the process of the Formal Vote on this specification.

### 1.1.5 IPP PSX LCRC Review and Approval

Ira led a review of the IPP Printer State Extensions (PSX) specification comments that were received during the Last Call period. Because none of them were technical content issues, the latest update has no redlined modifications.

The latest draft was accepted as written.

Ira requested that the Steering Committee begin the process of the Formal Vote on this specification. It was noted that both IPPv2.0 and IPP PSX will need to be processed in parallel, because of the dependency of IPPv2.0 on PSX.

**ACTION:** Ira McDonald will issue a clean draft of both the IPPv2.0 and the IPP PSX documents (marked as WD, not LCRC) for submission to the Formal Vote process.
