Phone Meeting, October 22, 1PM PDT.
(minutes taken by Steve Zilles)

Attendees
    Ira McDonald
    Tom Hastings
    Bob Herriot
    Peter Zehler
    Roger deBry
    Scott Isaacson
    Don Wright
    Steve Zilles
    Jay Martin (late)

Notification

    Discussed Carl-Uno's text:

    Is Notification in scope?

    Need to make it clear that the mechanism is out of
    scope, but that the format of the message is in scope.

    We should say the message SHOULD be human readable; the
    problem with this is that the experience with
    PostScript error messages has shown that machines will
    begin to parse and use the "human readable" messages
    and we will be stuck with them forever.

    Resolved (Unanimous): Remove the Notification
    mechanism, including the two attributes, "notifiy-
    events" and "notify-addresses", from the Model Draft
    and begin work on a separate document to define IPP
    Notification. The removed attributes would be
    registered using the IPP extension mechanism when a
    suitable interoperable draft exists.

Range of attribute syntaxes:

    Resolved (Unanimous): the proposed text fix (re: full
    range) for 5.2.5 will be adopt and similar text for 5.1
    will be added as well.

Bob Herriot will clean up Protocol document re description
of xxx-attributes-tags.

Scott will call Paul and Sylvan re:
    Why does the protocol allows 1, 2 and 4 byte integers?
Most things are now 4 byte.

Relationship between the Printer MIB and Job MIB and IPP

    Resolved (Unanimous): that the relationship between the
    Printer MIB and Job MIB and IPP will be described in a
    separate I-D authored by Harry Lewis and Tom Hastings.

This action was taken to reduce dependencies between documents with different progression rates. it should not in any way be interpreted as indicating that these documents are not important; the document is very important!

Ira will do a separate draft of the IANA message with the registration of the application/ipp Media type and send it to the mailing.

Scott is targetting Friday for an new draft of the Model document; he is only awaiting text from Steve Zilles re handling of proceesing attributes.

Bob has issued a version a week ago; a new version is needed to describe the Internationalization changes, the description of xxx-attributes-tag and notification changes. This draft is targeted for Friday.

The meeting was adjourned at 2:10 PDT.
