

# PWG IPP Printer State Extensions

## Working Group Meeting

### Conference Call Minutes

#### September 28, 2006

Craig Whittle - Acting Secretary

Meeting was called to order at approximately 11 a.m. EDT September 28, 2006 by Ron Bergman.

### Attendees

Ron Bergman	Ricoh
Ira McDonald	High North
Craig Whittle	Sharp
Harry Lewis	IBM

### General Discussion

- August 31<sup>st</sup> meeting minutes approved.
- Ira introduced the latest draft of the working document—see <ftp://ftp.pwg.org/pub/pwg/ipp/wd/wd-ippstate10-20060923.htm>  
<ftp://ftp.pwg.org/pub/pwg/ipp/wd/wd-ippstate10-20060923.pdf>
- Ira reminded the group that the request from BMLinks was simply to add printer-state-reason values to support finishing devices. The latest working draft supports the additional values and the more extensible approach to map existing MIB and IPP objects to the PSX IPP extension.
- The next teleconference is scheduled for October 12, 2006. Participants were encouraged to ping their respective BMLinkS representatives. We should also ask if a prototype implementation is planned.
- Ira has a few more “cut and paste” edits to add to the working draft.
- Ira reported that Paul Danbold from Apple is supportive of these changes. He indicated that Paul was encouraging Michael Sweet to incorporate these changes in CUPS.

## **Next Steps / Open Actions:**

- Participants were encouraged to ping their respective BMLinkS representatives. We should also ask if a prototype implementation is planned.
- Next teleconference is tentatively scheduled for October 12, 2006 at 11 a.m. EDT.
