    - One technical comment - laminating-type 'silicone' is very specific where we normally try to stick to more generic semantic meanings like 'water-resistant'.
        - Consensus is to replace 'silicone' with 'water-resistant'
        - Action: Mike to post RFC for laminating-type value 'water-resistant' to IPP list
    - Remaining comments are all editorial, Smith will address in the final published document
8. Next steps
    - Skip June 23 and July 21 meetings - conflicts for Mike and Smith (at least)
    - Need to schedule OAuth 2.0 discussion with Google developers (hopefully July 7 call)
    - Need to also sync up with Microsoft for OAuth 2.0 and Universal Print Service
    - Smith: Maybe also bring Mopria into the discussion for OAuth 2.0?

Next Steps / Open Actions

- Possibly swap IPP and IDS conference call days
- Next conference calls on July 7 and August 4, 2022 at 3pm
- Action: Mike to post RFC for laminating-type value 'water-resistant' to IPP list
