

The Printer Working Group

IPP Workgroup Session, Day 1

February 14, 2017

Sunnyvale, CA (Apple)

PWG IP Policy

- "This meeting is being held in accordance with the PWG Intellectual Property Policy"
 - http://www.pwg.org/chair/membership_docs/pwg-ip-policy.pdf
- TL;DR: Anything you say in a PWG meeting or email to a PWG address can be used in a PWG standard
 - (but please do read the IP policy above if you haven't done so)

February 14, 2017

When	What
2:30 - 3:00	IPP Workgroup Status and Updates
3:00 - 5:00	IPP System Service

February 15, 2017

When	What
9:00 - 9:45	IPP Finishings 2.1
9:45 - 11:45	IPP 3D and Related Standards
11:45 - 12:00	Next Steps

- Current charter:
 - <http://ftp.pwg.org/pub/pwg/ipp/charter/ch-ipp-charter-20151225.pdf>
- The Internet Printing Protocol (IPP) workgroup is chartered with the maintenance of IPP, the IETF IPP registry, and support for new clients, network architectures (Cloud, SDN), service bindings for MFDs and Imaging Systems, and emerging technologies such as 3D Printing
- In addition, we maintain the IETF Finisher MIB, Job MIB, and Printer MIB registries, and handle synchronization with changes in IPP

- **IPP WG Co-Chairs:**
 - Paul Tykodi (TCS)
 - Ira McDonald (High North)
- **IPP WG Secretary:**
 - Michael Sweet (Apple)
- **IPP WG Document Editors:**
 - Ira McDonald (High North) – IPP System Service (SYSTEM)
 - Michael Sweet (Apple) – IPP System Service (SYSTEM), IPP 3D Printing Extensions
 - Smith Kennedy (HP Inc.) – IPP Finishings 2.1

Status (1/2)

- **PWG Specifications in development:**
 - IPP 3D Printing Extensions (3D) - Completed PWG Formal Vote
 - IPP System Service (SYSTEM) - Interim Draft
 - IPP Finishings 2.1 (FIN) - PWG Formal Vote
- **Recent Candidate Standards:**
 - PWG 5100.20-2016: IPP Everywhere Printer Self-Certification Manual v1.0 (SELFCERT)
- **Recent IETF RFCs:**
 - RFC 8010: Internet Printing Protocol/1.1: Encoding and Transport
 - RFC 8011: Internet Printing Protocol/1.1: Model and Semantics

Status (2/2)

- Up-to-date pending IANA registrations online:
 - <http://www.pwg.org/ipp/ipp-registrations.xml>
 - Continue to maintain this in parallel for new specifications
 - Github repository: <https://github.com/istopwg/ippregistry>
- IPP Everywhere Printer Self-Certifications:
 - <https://www.pwg.org/printers>
 - 25 printers currently listed
- IPP Sample Code:
 - Github repository:
 - <https://github.com/istopwg/ippsample>
 - Fork of CUPS code includes ippfind, ippproxy, ippserver, and ipptool

IETF IPP/1.1 Updates

- RFCs 8010 and 8011 have been published which replace (obsolete) RFCs 2910, 2911, 3381 (deprecated job progress attributes), and 3382 (collection attribute syntax)
- Published RFCs:
 - <http://tools.ietf.org/html/rfc8010>
 - <http://tools.ietf.org/html/rfc8011>
 - *RFCs will eventually be advanced to IETF Internet Standard through status change (IESG process described in RFCs 2026 and 6410)*
- Proposed schedule:
 - Request IESG change of status in July 2017 (six months after the publication of RFCs 8010 and 8011)

IPP Everywhere Self-Certification

- Resources:
 - <http://www.pwg.org/ipp/everywhere.html> (for tools/info)
 - <https://www.pwg.org/ippeveselfcert> (submission form)
 - <http://www.pwg.org/printers> (printer list)
 - <https://github.com/istopwg/ippeveselfcert> (Github repo)
- Released v1.0 Update 1 of self-certification tools on October 28th, 2016
- Planning future 1.1 errata update for manual and tools in 2017:
 - More tests (Cancel-My-Jobs, Close-Job, Identify-Printer)
 - Other necessary changes that are not simple bug fixes in the tools/submission portal
- Proposed Schedule:
 - 1.1 errata update: Q1/Q2 2017

The Printer Working Group

Break

IPP System Service (SYSTEM)

- Current interim draft at:
 - <http://ftp.pwg.org/pub/pwg/ipp/wd/wd-ippssystem10-20170108-rev.pdf>
- Combines and implements a concrete IPP binding of the following abstract Semantic Model 2.0 services and objects:
 - PWG 5108.06: System Object and System Control Service
 - PWG 5108.03: Network Resource Service
 - PWG 5109.1: Cloud Imaging Requirements and Model
- Proposed Schedule:
 - Prototype draft in Q1/Q2 2017

Proposal/White Paper

- White Paper (if we have one):
 - ...
- **Get-User-Printer-Attributes/Get-User-Supported-Values**
 - Defines an operation that provides a Get-Printer-Attributes response filtered by the most authenticated user
 - Useful for things like limiting which users can print in color, use a particular letterhead, etc.
 - Clients that support the operation will only show available print options to the user instead of reporting an error (or having the options silently overridden by the Printer) when the user submits the job
 - Needed because Get-Printer-Attributes is not defined as an authenticated operation (so no clients support it), nor does it include the "most authenticated user identity" as a filter criteria (which isn't something we can expose using "get-attributes-supported")
- Want to discuss how we will formally define and register this operation

The Printer Working Group

IPP Workgroup Session, Day 2

February 15, 2017

Sunnyvale, CA (Apple)

- "This meeting is being held in accordance with the PWG Intellectual Property Policy"
 - http://www.pwg.org/chair/membership_docs/pwg-ip-policy.pdf
- TL;DR: Anything you say in a PWG meeting or email to a PWG address can be used in a PWG standard
 - (but please do read the IP policy above if you haven't done so)

February 14, 2017

When	What
2:30 - 3:00	IPP Workgroup Status and Updates
3:00 - 5:00	IPP System Service

February 15, 2017

When	What
9:00 - 9:45	IPP Finishings 2.1
9:45 - 11:45	IPP 3D and Related Standards
11:45 - 12:00	Next Steps

IPP Finishings 2.1

- Current stable draft:
 - <http://ftp.pwg.org/pub/pwg/ipp/wd/wd-ippfinishings21-20170111-rev.pdf>
- PWG Formal Vote ends February 17, 2017 (this Friday)
 - <http://www.pwg.org/pipermail/pwg-announce/2017/003777.html>
- One reported issue/question concerning how to include the 'jog-offset' finishing process
 - Answer is to use a "finishing-template" value of 'job-offset'
 - Will investigate whether a "jogging" collection is necessary for "finishings-col" in a future update

IPP 3D Printing Extensions

- Current stable draft:
 - <http://ftp.pwg.org/pub/pwg/ipp/wd/wd-ipp3d10-20170110-rev.pdf>
- PWG Formal Vote Concluded on February 10, 2017
 - Results: ...
- Editorial comments:
 - Need to update RFC 8010/8011 references (new publication date)
 - Request to change attribute name (next slide)
- Next steps:
 - Publication: ASAP
 - Interoperability testing: Q1 2018?
 - Continue to develop IPP sample code?

IPP 3D Printing Extensions

- Request to change name of "print-rafts" Job Template attribute to "print-base"
 - It is more than just rafts - values include 'brim', 'raft', and 'skirt'
 - Current name is a holdover from existing 3D printer UI which started with rafts and then added brims and skirts
 - No change in semantics, just a wording change
- Also affects the 'raft' value for "material-purpose"
- Change list:
 - "print-rafts" -> "print-base"
 - "print-rafts-default" -> "print-base-default"
 - "print-rafts-supported" -> "print-base-supported"
 - "material-purpose" value 'raft' -> 'base'

Other 3D Standards Activities

- ANSI Additive Manufacturing Standardization Collaborative (AMSC)
 - <http://www.ansi.org/amsc>
- ASTM F42
 - <https://www.astm.org/COMMITTEE/F42.htm>
- ISO TC 261
 - http://www.iso.org/iso/iso_technical_committee?commid=629086

Other 3D Standards Activities

- AMSC is trying to coordinate the standards activities of multiple organizations
- Focus is largely on material and device standardization and validation for metal powder printing
 - Quality control issues are a major issue - very hard to get consistent, repeatable results
- Machine interfaces are largely seen as an "unsolvable" problem
 - Probably due to the process orientation (implementation details differ wildly between vendors) - no attempt to develop an abstract data model or interfaces like we have in IPP/PWG SM
- Currently no recognition of document formats other than STL and AMF
- Most work is happening behind "closed doors" - investigating liaison opportunities

Where IPP 3D Fits

- IPP provides a high-level vendor-neutral machine interface between Clients and Printers (or print services) that allows Clients to discover Printers, query for status and capabilities, submit jobs, and then query the status of those jobs
- Capabilities can be extended to include things like material or process conformance to a particular standard (currently being defined by ANSI/ASTM/ISO)
- Finishing processes can be extended to include things like annealing, polishing, etc., although typically such things are done by separate machines
- Job processing already supports multiple document formats identified by MIME media type, i.e., supporting STL and AMF is already possible
- In short: we are right in the middle

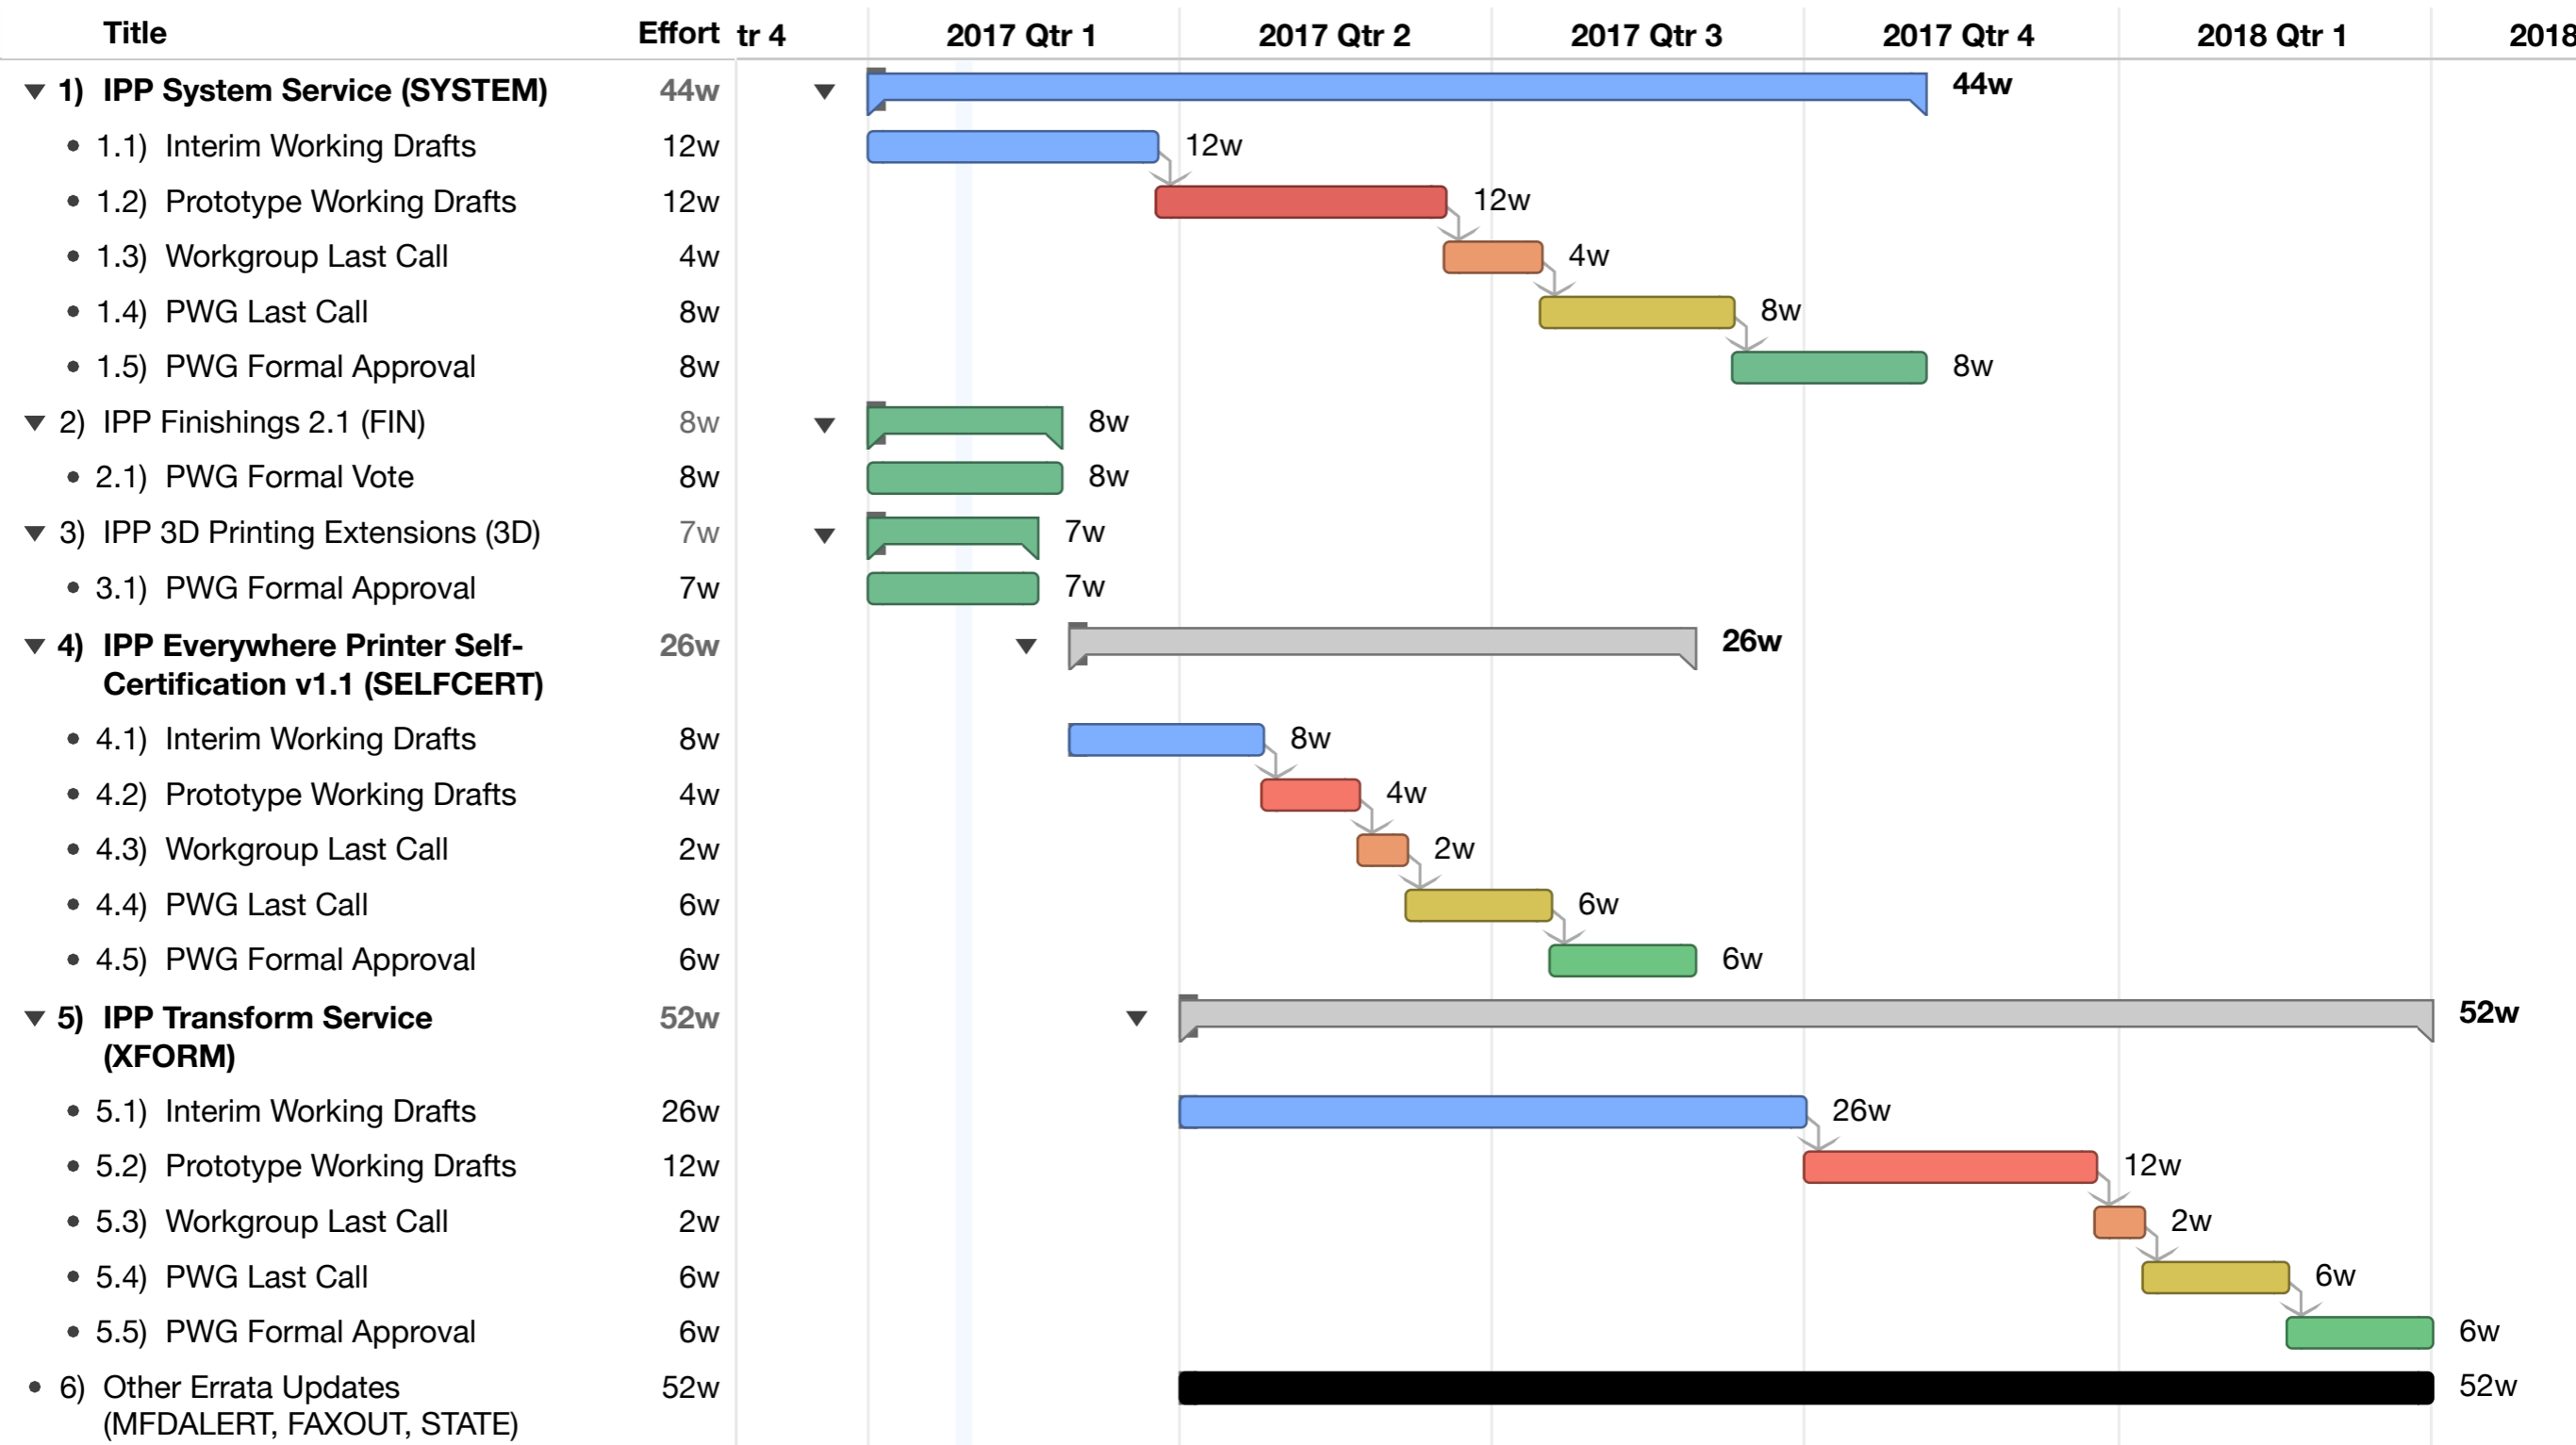

The Printer Working Group

Next Steps

Next Steps

Next Steps

- Advance IPP/1.1 to IETF Internet Standard
 - Request change of status in July 2017
- IPP System Service
 - Prototype working draft in Q1/Q2 2017
- IPP 3D Printing Extensions
 - Publish approved candidate standard
 - Other work/liaisons as appropriate
- IPP Finishings 2.1
 - Complete PWG Formal Vote
- IPP Everywhere Printer Self-Certification Manual v1.1
 - Interim working draft in Q1/Q2 2017
- IPP Transform Service v1.0
 - Initial working draft in Q1/Q2 2017
- Other errata (IPP State, etc.) in 2017
 - Specific documents for 2017?
 - Volunteers?

More Information

- We welcome participation from all interested parties
- IPP Working Group web page
 - <http://www.pwg.org/ipp/index.html>
- Subscribe to the IPP mailing list
 - <https://www.pwg.org/mailman/listinfo/ipp>
- IPP WG holds weekly phone conferences announced on the IPP mailing list
 - Next conference calls March 1, 2017 and March 15, 2017 at 1pm ET
