Media Standardized Names

Draft 5101.1-D0.7

April 20, 2001

<ftp://ftp.pwg.org/pub/pwg/media-sizes/pwg-media-07.pdf> (.doc)

Abstract

This document specifies standard names to be used to indicate media types, media colors, and media sizes in other standards. These lists of names are a superset of the names that are currently presented in the Printer MIB [PRT-MIB] and the IPP Model and Semantics [IPP-MOD] documents. It is intended to supplement the currently defined lists as well as to provide a normative reference for all subsequent standards.

This document is a draft of an IEEE-ISTO PWG Proposed Standard and is in full conformance with all provisions of the PWG Process (see <http://www.pwg.org/chair/pwg-process-990825.pdf>). PWG Proposed Standards are working documents of the IEEE-ISTO PWG and its working groups. The list of current PWG projects and drafts can be obtained at <http://www.pwg.org>.

Copyright (C) 2001, IEEE Industry Standards and Technology Organization. All rights reserved.

This document may be copied and furnished to others, and derivative works that comment on, or otherwise explain it or assist in its implementation may be prepared, copied, published and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice, this paragraph and the title of the Document as referenced below are included on all such copies and derivative works. However, this document itself may not be modified in any way, such as by removing the copyright notice or references to the IEEE-ISTO and the Printer Working Group, a program of the IEEE-ISTO.

28 Title: Media Standardized Names

29 The IEEE-ISTO and the Printer Working Group DISCLAIM ANY AND ALL WARRANTIES,
30 WHETHER EXPRESS OR IMPLIED INCLUDING (WITHOUT LIMITATION) ANY IMPLIED
31 WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

32 The Printer Working Group, a program of the IEEE-ISTO, reserves the right to make changes to the
33 document without further notice. The document may be updated, replaced or made obsolete by other
34 documents at any time.

35 The IEEE-ISTO takes no position regarding the validity or scope of any intellectual property or other
36 rights that might be claimed to pertain to the implementation or use of the technology described in this
37 document or the extent to which any license under such rights might or might not be available; neither
38 does it represent that it has made any effort to identify any such rights.

39 The IEEE-ISTO invites any interested party to bring to its attention any copyrights, patents, or patent
40 applications, or other proprietary rights which may cover technology that may be required to
41 implement the contents of this document. The IEEE-ISTO and its programs shall not be responsible for
42 identifying patents for which a license may be required by a document and/or IEEE-ISTO Industry
43 Group Standard or for conducting inquiries into the legal validity or scope of those patents that are
44 brought to its attention. Inquiries may be submitted to the IEEE-ISTO by e-mail at:

45 ieee-isto@ieee.org.

46 The Printer Working Group acknowledges that the IEEE-ISTO (acting itself or through its designees)
47 is, and shall at all times, be the sole entity that may authorize the use of certification marks,
48 trademarks, or other special designations to indicate compliance with these materials.

49 Use of this document is wholly voluntary. The existence of this document does not imply that there
50 are no other ways to produce, test, measure, purchase, market, or provide other goods and services
51 related to its scope.

91

92 **1. Introduction**

93 Media types, media colors, media sizes, and media finish have been defined in many previously
94 published standards related to printing. Examples are the ISO Document Printing Application [DPA],
95 the IEEE Transport Independent Printer/System Interface [TIP/SI], the IETF Printer MIB [PRT-MIB],
96 and the IETF Internet Printing Protocol [IPP-MOD]. Although there is a high degree of commonality
97 in the set of media types, colors, sizes, and finish presented in these documents, they do not represent a
98 uniform set. Several other standard developments, in process prior to the creation of this standard, also
99 have a need for media type, color, size, and finish definitions. Also there is a large body of existing
100 computer printing system practice based upon PPD and GPD files to describe a Printer's capabilities
101 that include media type, color, size, and finish. Thus this standard is a response to an urgent need to
102 define a complete set of media types, colors, sizes, and finishings, in an independent document, that
103 can be used as a normative reference by other standards.

104 This standard is the result of extensive research to obtain an exhaustive list. It provides a superset of
105 the media types, colors, sizes, and finishings currently defined in the previously listed specifications.
106 This standard is intended to update the list that is currently presented in the Printer MIB and the IPP
107 Model and Semantics specification and it also can be referenced by future standards. This document
108 will be periodically updated to include any additional types, colors, sizes, and finishings, as required.
109

110 **1.1 Scope**

111 This document defines media types, media colors, media sizes, and media finish only. Other media
112 attributes such as name, weight, or opacity are not included at this time, though they may be added in
113 the future, if the need arises.

114 No provisions are included to specify roll paper sizes. All media sizes defined represent a cut sheet.
115 Media that is printed and then cut by the printing device can use this standard only to define the final
116 size.

117 The color attribute that is included in a portion of the Media Name entries in both the Printer MIB and
118 IPP are included as a separate independent set of Color Names in this specification.
119

120 The media size dimensions that are defined in this document are independent of the media feed
121 direction (i.e. short edge feed or long edge feed) or printing orientation (i.e. portrait or landscape).
122 Both of these parameters are best handled by unique attributes rather than overloading the media size
123 attribute.

124 **2 Terminology**

125 This glossary defines certain terms used in this specification which may not be generally familiar or
126 which may be used with very specific meaning. These definitions are not intended to be absolute but
127 do reflect the use of the terms within this specification.

- 128 **Alias** An alternative name that is commonly used to mean the same as a name standardized in this
129 document, but which is not defined for a use that conforms to this standard.
- 130 **ASCII** American Standards Code for Information Exchange as defined in ANSI X3.4-1986, "Coded
131 Character Set - 7-bit American Standard Code for Information Interchange (ASCII)." Defines a
132 character set encoding with printable characters defined in the range 0x21 to 0x7E and the SPACE
133 character (0x20). Other encoded values must not be used.
- 134 **IETF** Internet Engineering Task Force. A volunteer group that develops and approves standards that
135 are relative to the Internet.
- 136 **ISO** International Organization for Standardization.
- 137 **Legacy Name** A name used in the same contexts as the names defined in this standard, but which is
138 deprecated from use when conforming to this standard. This name is provided for historical context.
- 139 **media** The consumable upon which the marking engine marks so as to form a text and/or pictorial
140 image, typically paper.
- 141 **Media Color Name** The human readable name used to identify the color of the media. Examples:
142 'white', 'red', 'ivory'.
- 143 **Media Dimensions** The short and long dimensions of the media.
- 144 **Media Finish Name** The human readable name that identifies the surface texture of the medium. In
145 most cases the texture is obtained by the application of a coating. Examples: 'glossy', 'matte'.
- 146 **Media Name** The human readable name used to identify media that possess the same characteristics
147 and to distinguishes the media from others with different characteristics for the context in which the
148 Media Name is used. Examples: 'iso-a4-white', 'na-letter-transparency', 'monarch-envelope'. This
149 standard does not define Media Names.
- 150 **Media Size Name** The human readable name that identifies a particular media size. Examples: 'iso-
151 a4', 'na-letter', 'monarch'.
- 152 **Media Size Self Describing Name** (or **Media Size** for short) An ASCII string that contains a Media
153 Size Name and the Media Dimensions that correspond to the Media Size Name. Examples: 'iso-
154 a4.2100-2970', 'na-letter.8500-11000', 'na-monarch.3875-7500'.
- 155 **Media Type Name** The human readable name that identifies a particular medium type, i.e., the
156 predominate characteristic of the media. Examples: 'stationery', 'transparency', 'envelope'.

157 **3 Media Type Names**

158 The standardized Media Type Names are defined in Table 1. The base set of these names is derived
159 from the Printer MIB [PRT-MIB] and 'Media Features for Display, Print, and Fax' [FEATURES]
160 documents. Additional values MAY be registered according to both [TAG-REG] and [IPP-MOD].

161 The *Ref* column indicates in which document(s) the identical name appears.

162 1 = The Printer MIB

163 3 = Media Features for Display, Print, and Fax

164

165

Table 1 - Standardized Media Type Names

| Keyword | Description | Ref. |
|------------------|--|------|
| stationery | Separately cut sheets of an opaque material | 1, 3 |
| transparency | Separately cut sheets of a transparent material | 1, 3 |
| envelope | Envelopes that can be used for conventional mailing purposes | 1, 3 |
| envelope-plain | Envelopes that are not preprinted and have no windows | 1, 3 |
| envelope-window | Envelopes that have windows for addressing purposes | 1 |
| continuous | Continuously connected sheets of an opaque material - which edge is connected is not specified | 3 |
| continuous-long | Continuously connected sheets of an opaque material connected along the long edge | 1 |
| continuous-short | Continuously connected sheets of an opaque material connected along the short edge | 1 |
| tab-stock | Media with tabs [either pre-cut or full-cut] | 1 |
| pre-cut-tabs | Media with tabs that are cut so that more than one tab is visible extending out beyond the edge of non-tabbed media in an Output-Document. | |
| full-cut-tabs | Media with a tab that runs the full length of the sheet so that only one tab is visible extending out beyond the edge of non-tabbed media in an Output-Document. | |
| multi-part-form | Form medium composed of multiple layers not pre-attached to one another; each sheet may be drawn separately from an input source | 1 |
| labels | Label stock [For example, a sheet of peel-off labels]. | 1 |
| multi-layer | Form medium composed of multiple layers which are pre-attached to one another; e.g., for use with impact printers. | 1 |
| screen | A refreshable display | 3 |
| screen-paged | A refreshable display which cannot scroll | 3 |
| photographic | Separately cut sheets of an opaque material to produce photographic quality images | |
| cardstock | Separately cut sheets of a heavier or stiffer opaque material than stationery | |
| roll | A continuous roll of media with no predefined page separation points. | |

166

167 **3.1 Custom Media Type Names**

168 Media Type Names may be locally extended using a Custom Media Type Name, without an update to
 169 this specification. The format is defined by the following ABNF:

170 `custom-media-type-name = "custom-media-type-" type-name`

171 `type-name = lowalpha *(lowalpha | digit | "-")`

172 `lowalpha = "a" | "b" | "c" | "d" | "e" | "f" | "g" | "h" | "i" |`
 173 `"j" | "k" | "l" | "m" | "n" | "o" | "p" | "q" | "r" |`
 174 `"s" | "t" | "u" | "v" | "w" | "x" | "y" | "z"`

175 `digit = "0" | "1" | "2" | "3" | "4" | "5" | "6" | "7" | "8" | "9"`

176 Example, preprinted stationery for company XYZ: `custom-media-type-xyz-letterhead`

177 **4 Media Color Names**

178 Table 2 defines the standardized Media Color Names. These names are derived primarily from the
 179 Printer MIB [PRT-MIB], prtInputMediaColor standard values. One major difference from the Printer
 180 MIB, the name 'transparent' has been replaced by 'no-color'. This allows use of a color attribute with
 181 the media type 'transparency' as defined in Table 1.

182 The *Ref* column contains the value 1 for those entries that are from the Printer MIB.

183

184

Table 2 - Media Color Names

| Color Name | Ref. | Description |
|------------|------|--|
| no-color | | The specified media should have no color. (example, a clear transparency media type) |
| white | 1 | The specified media should be white. |
| pink | 1 | The specified media should be pink. |
| yellow | 1 | The specified media should be yellow. |
| blue | | The specified media should be blue. |
| green | 1 | The specified media should be green. |
| buff | 1 | The specified media should be buff. |
| goldenrod | 1 | The specified media should be goldenrod. |
| red | | The specified media should be red. |
| gray | | The specified media should be gray. |
| ivory | | The specified media should be ivory. |
| orange | | The specified media should be orange. |

185

186 **4.1 Custom Media Color Names**

187 Media Color Names may be locally extended using a Custom Media Color Name, without an update to
 188 this specification. The format is defined by the following ABNF:

```

189 custom-media-color-name = "custom-media-color-" color-name
190 color-name = lowalpha *( lowalpha | digit | "-" )
191 lowalpha = "a" | "b" | "c" | "d" | "e" | "f" | "g" | "h" | "i" |
192           "j" | "k" | "l" | "m" | "n" | "o" | "p" | "q" | "r" |
193           "s" | "t" | "u" | "v" | "w" | "x" | "y" | "z"
194 digit = "0" | "1" | "2" | "3" | "4" | "5" | "6" | "7" | "8" | "9"
    
```

195 Example, a media of the color mauve: `custom-media-color-mauve`

196 **5 Media Size Self Describing Names**

197 The media size specifications defined in this document, labeled as Media Size Self Describing Names,
 198 are cross indexed to Legacy Names and Alias (common) names. The Legacy Names define the names
 199 currently used in the ISO DPA, Printer MIB, or IPP documents. A reference column is included in the
 200 tables to indicate which of these three documents contain the Legacy Name.

201 *Ref* column entry definitions:

202 1 = Printer MIB and ISO DPA. (Both documents contain an identical set.)

203 2 = IPP

204

205 5.1 Media Size Self Describing Name Format

206 This specification defines a new Media Size Self Describing Name format that is recommended to be
 207 used by all new implementations. This new format has the Media Size Name and the Media
 208 Dimensions embedded within the string and allows a device to operate without a Media Size Name to
 209 Media Dimensions table. The Media Size Self Describing Name format is structured as follows using
 210 ABNF:

```
211 media-size-self-describing-name = [prefix] size-name "." short-dim "-" long-dim
```

```
212 prefix = "na-"
```

```
213 size-name = lowalpha *( lowalpha | digit | "-" )
```

```
214 short-dim = *digit
```

```
215 long-dim = *digit
```

```
216 lowalpha = "a" | "b" | "c" | "d" | "e" | "f" | "g" | "h" | "i" |
```

```
217 "j" | "k" | "l" | "m" | "n" | "o" | "p" | "q" | "r" |
```

```
218 "s" | "t" | "u" | "v" | "w" | "x" | "y" | "z"
```

```
219 digit = "0" | "1" | "2" | "3" | "4" | "5" | "6" | "7" | "8" | "9"
```

220 **5.1.1 *prefix*** This string parameter is present to indicate the size dimensions are in English units. The
 221 value of the prefix string is "na-". The prefix string must not be present if the size dimensions are in
 222 metric units.

223 **5.1.2 *size-name*** This string provides a textual description of the media size. It is normally derived
 224 from the Legacy or Alias name associated with the media size. The size-name can consist of multiple
 225 words, with each word separated by a hyphen (0x2D).

226 **5.1.3 *short-dim* and *long-dim*** These values define the media size. The *short-dim* is always the
 227 smaller of the two dimensions.

228 For size dimensions measured in English units, the unit of measure is inches/1000 (.001 inches).

229 For size dimensions measured in Metric units, the unit of measure is millimeters/10 (.1 mm).

230 5.1.4 General

231 The Media Size Self Describing Name shall not contain any space characters (0x20).

232 Wherever possible, the Media Size Self Describing Name has been derived from the Legacy Name. In
 233 many cases the 'prefix-size-name' portion is identical to the Legacy Name. In the remaining cases, the
 234 'prefix' portion must be ignored to match the Legacy Name.

235 5.1.5 Examples:

236 The letter size (8.5 inches by 11 inches) used in North America: **na-letter.8500-11000**

237 The iso A4 size (210 mm by 297 mm) used in metric countries: **iso-a4.2100-2970**

238

239 5.2 Custom Media Size Self Describing Name Format

240 The Custom Media Size Self Describing Name format allows extensibility of the media size set
241 without an update to this specification. This feature is primarily intended for special media sizes that
242 are used at a minimum number of locations. The Media Size Self Describing Name format for custom
243 sizes is structured similar to the format for the standardized sizes.

```
244     custom-media-size-self-describing-name =  
245     [prefix] "custom" [ "-" size-name ] "." short-dim "-" long-dim
```

246 **5.2.1 prefix** This string parameter must conform to all the requirements of section 5.1.1.

247 **5.2.2 size-name** This string is optional and, if used, provides a textual description of the media size.
248 The *size-name* must conform to all the requirements of section 5.1.2.

249 **5.2.3 short-dim and long-dim** These values must conform to all requirements of section 5.1.3.

250 **5.2.4 Example:** A custom form measuring 6 inches by 14 inches known as "long and narrow".

251 **na-custom-long-and-narrow.6000-14000** or **na-custom.6000-14000**

252 **5.2.5** The *size-name* "max" shall be reserved to indicate an upper size limit of either a device or
253 application. Also, the *size-name* "min" shall be reserved to indicate a lower size limit. Example: For a
254 device that can process forms as small as 2 x 3 inches to 18 x 36 inches:

255 **na-custom-max.18000-36000** and **na-custom-min.2000-3000**

256 5.3 Conventions for the Tables

257 The rest of this section contains the tables of Media Size Self Describing Names. Within a table
258 entries from different sources are grouped together. The entries in these groups are arranged in order
259 of increasing size of the smaller dimension.

260 The presence of "(envelope)" in the Alias column indicates this size is also commonly used for
261 envelopes. It does not imply that this size is only available as an envelope media type.

262

Table 3 - North American Standard Sheet Media Sizes

| Legacy Name | Ref. | Alias (common name) | Self Describing Name (inches / 1000) |
|-----------------------|------|-------------------------------|--------------------------------------|
| | | index-3x5 | na-index-3x5.3000-5000 |
| | | personal (envelope) | na-personal.3625-6500 |
| monarch-envelope | 2 | | na-monarch.3875-7500 |
| na-number-9-envelope | 1, 2 | | na-num-9.3875-8875 |
| | | index-4x6 | na-index-4x6.4000-6000 |
| na-number-10-envelope | 1, 2 | | na-num-10.4125-9500 |
| | | a2 (envelope) | na-a2.4375-5750 |

278

279 6 Media Finish Names

280 The standardized Media Finish Names are defined in Table 8. The base set of these names is derived
 281 from the "IPP Production Printing Attributes – Set 1" [PROD] document. Additional values MAY be
 282 registered according to both [TAG-REG] and [IPP-MOD].

283 The *Ref* column contains the value 4 for those entries that are from the Printer "IPP Production Printing
 284 Attributes" document.
 285

286

Table 8 - Media Finish Names

| Finish Name | Ref. | Description |
|-------------|------|--|
| none | 4 | Indicates that the media does not have any coating. |
| glossy | 4 | Indicates that the media has a "glossy" coating. |
| high-gloss | 4 | Indicates that the media has a "high-gloss" coating. |
| semi-gloss | 4 | Indicates that the media has a "semi-gloss" coating. |
| satin | 4 | Indicates that the media has a "satin" coating. |
| matte | 4 | Indicates that the media has a "matte" coating. |

287

288 6.1 Custom Media Finish Names

289 Media Finish Names may be locally extended using a Custom Media Finish Name, without an update
290 to this specification. The format is defined by the following ABNF:

```
291 custom-media-finish-name = "custom-media-finish- " finish-name
292 finish-name = lowalpha *( lowalpha | digit | "-" )
293 lowalpha = "a" | "b" | "c" | "d" | "e" | "f" | "g" | "h" | "i" |
294           "j" | "k" | "l" | "m" | "n" | "o" | "p" | "q" | "r" |
295           "s" | "t" | "u" | "v" | "w" | "x" | "y" | "z"
296 digit    = "0" | "1" | "2" | "3" | "4" | "5" | "6" | "7" | "8" | "9"
```

297 Example, a media coating that is non-reflective: `custom-media-finish-non-reflective`

298 7 Conformance Requirements

299 The Media Type Names, Media Color Names, Self Describing Media Size Names, and Media Finish
300 Names defined in this document are recommended for any future specifications that have a need for
301 media type, media color, media size definitions, or media finish, respectively. The proper procedure
302 for including these names is to simply reference this specification as the definition and source of the
303 media types, colors, sizes, or finishings with the clause "or subsequent revisions". In this manner, any
304 updates to this document are automatically included in the referencing specification.

305 Media Names defined in this specification are presented using lower case characters. Other referencing
306 standards may impose case sensitive rules if necessary. For interoperability and implementation
307 efficiency, this standard strongly recommends these names be used in the lower case form defined in
308 this document.

309 8 Internationalization Considerations

310 All standardized textual strings must be represented as US-ASCII character codes and local
311 translations must never be performed. Custom sizes, if limited to local use, may be represented using
312 any desired character set.

313 9 Security Considerations

314 This specification will have no impact on the security burden of or potential threats to the importing
315 system.

362 IPP Mailing List: ipp@pwg.org

363 To subscribe to the ipp mailing list, send the following email:

364 1) send it to majordomo@pwg.org

365 2) leave the subject line blank

366 3) put the following two lines in the message body:

367 subscribe ipp

368 end

369 Implementers of this specification are encouraged to join the IPP Mailing List in order to participate in
370 any discussions of clarifications or review of registration proposals for additional names. Requests for
371 additional names, for inclusion in this specification, should be sent to the IPP Mailing list for
372 consideration.

373

374 **12 Appendix A: Media Names Usage in Existing Standards (informative)**

375 This appendix provides a cross reference between the usage of media names in existing standards and
376 the appropriate group in this document. Future revisions of these standards should reference this
377 document as the source of this information. No attempt will be made to update this appendix when
378 additional standards reference this document; the existing references will suffice.

379 **The Printer MIB [PRT-MIB]**

380

| Standard Media Name | Printer MIB usage |
|---------------------|---|
| Media Type Name | prtInputMediaType |
| Media Color Name | prtInputMediaColor |
| Media Size Name | Appendix B "Media Sizes Names" (see note 1) |

381 **The Internet Printing Protocol, Model and Semantics [IPP-MOD]**

382

| Standard Media Name | IPP Model Usage |
|---------------------|---|
| Media Type Name | "media" Job Template attribute, including the "media-default", "media-ready", and "media-supported" Printer attributes |

383 **The Internet Printing Protocol, Production Printing Attributes [IPP-PROD]**

384

| Standard Media Name | IPP Production Printing Usage (see notes 2 and 3) |
|---------------------|---|
| Media Type Name | "media-type" |
| Media Color Name | "media-color" |
| Media Finish Name | "media-front-coating" and "media-back-coating" |

385 Notes:

- 386 1. Printer MIB size names do not include the dimensions part. The dimension are represented by the
387 objects prtInputMediaDimFeedDirDeclared, prtInputMediaDimXFeedDirDeclared,
388 prtInputMediaDimFeedDirChosen, and prtInputMediaDimXFeedDirChosen.
- 389 2. The Production Printing Attributes referenced are all member attributes of the "media-col" Job
390 Template attribute.
- 391 3. The media sizes are included in the "media-size" member attribute of the "media-col" Job
392 Template attribute as a pair of numeric values (mm/100).

393 13 Appendix B: Description of the IEEE Industry Standards and Technology
394 (ISTO)

395 The IEEE-ISTO is a not-for-profit corporation offering industry groups an innovative and flexible
396 operational forum and support services. The IEEE-ISTO provides a forum not only to develop
397 standards, but also to facilitate activities that support the implementation and acceptance of standards
398 in the marketplace. The organization is affiliated with the IEEE (<http://www.ieee.org/>) and the IEEE
399 Standards Association (<http://standards.ieee.org/>).

400 For additional information regarding the IEEE-ISTO and its industry programs visit:

401 <http://www.ieee-isto.org>

402 14 Appendix C: Description of the IEEE-ISTO PWG

403 The Printer Working Group (or PWG) is a Program of the IEEE Industry Standards and Technology
404 Organization (ISTO) with member organizations including printer manufacturers, print server
405 developers, operating system providers, network operating systems providers, network connectivity
406 vendors, and print management application developers. The group is chartered to make printers and
407 the applications and operating systems supporting them work together better. All references to the
408 PWG in this document implicitly mean "The Printer Working Group, a Program of the IEEE ISTO." In
409 order to meet this objective, the PWG will document the results of their work as open standards that
410 define print related protocols, interfaces, procedures and conventions. Printer manufacturers and
411 vendors of printer related software will benefit from the interoperability provided by voluntary
412 conformance to these standards.

413 In general, a PWG standard is a specification that is stable, well understood, and is technically
414 competent, has multiple, independent and interoperable implementations with substantial operational
415 experience, and enjoys significant public support.

416 For additional information regarding the Printer Working Group visit:

417 <http://www.pwg.org>

418 **15 Appendix D: Change History**

419 **15.1 Changes to D.06, April 9, 2001, to make D.07, April 20, 2001**

420 The following changes were made:

421

- 422 1. Added to definition of Legacy Name: "This name is provided for historical context."
- 423 2. Removed single quotes from color names in table 2.
- 424 3. Added an example to paragraphs 3.1, 4.1 and 6.1.
- 425 4. Removed "The prefix string shall be included in all Media Size Self Describing Names that contain
426 size dimensions that are to be interpreted as English units." This sentence was redundant.
- 427 5. Corrected "iso-a5-extra" name in Table 4. The "-extra" part was missing.
- 428 6. Removed single quotes from finish names and "MUST" from the definitions in table 8.
- 429 7. Changed "custom-finish-type-" to "custom-media-finish-" in section 6.1.
- 430 8. Inserted a new Appendix A "Media Names Usage in Existing Standards (informative)".
- 431 9. Changed all RFC references to names that are independent of the numbers.
- 432 10. Added a URL to the IPP-PROD reference.

433 **15.2 Changes to D.05, March 26, 2001, to make D.06, April 9, 2001**

434 The following changes were made:

435

- 436 1. Added "Media Finish Name" definition to section 1, 1.1, 2, and 7.
- 437 2. Removed "other" from Table 1. The custom media type name is to be used instead.
- 438 3. Added "roll" to Table 1.
- 439 4. Changed "[REG]" to "[RFC2506]" in section 3 and added the reference information to section 10.
- 440 5. Corrected the ABNF for "size-name" in section 5.1 (removed second "| "-" ").
- 441 6. Removed text regarding case sensitivity from section 5.1.4. New text on this subject added to
442 section 7.
- 443 7. Corrected second example in section 5.1.5 ("2970" was "29700").
- 444 8. Added 5.2.5 to define "custom-max" and "custom-min".
- 445 9. Added section 6, Media Finish Names.
- 446 10. Added [PROD] reference to section 10.
- 447 11. Added IPP contact information to section 10, plus a sentence explaining how to request new names
448 to be added to the document.

449

450 **15.3 Changes to D.04, March 21, 2001, to make D.05, March 26, 2001**

451 The following changes were made:

452

- 453 1. Title in Abstract corrected. Was "Media Size Standardized Names."
- 454 2. Section 1 "...practice based upon PPD and GPD files to describe..." was "...practice around PPD
455 and GPD files that describe..."
- 456 3. In definition for Media Size Self Describing Name: "...Media Dimensions that correspond to the
457 Media Size Name." was "...Media Dimensions of that correspond to its Media Size Name."

- 458 4. Replaced “Printer MIB” and “RFC 2534” columns in Table 1 with “Ref.” Column, to be more
459 consistent with the size tables. Modified the text accordingly.
460 5. Added section 3.1 Custom Media Type Names.
461 6. Added a “Ref.” Column to Table 2 and removed the text that attempted to provide this same
462 information.
463 7. Added section 4.1 Custom Media Color Names.
464 8. Combined paragraphs 5.1.5 and 5.1.6.
465 9. Added to paragraph 5.3: “The presence of “(envelope)” in the Alias column indicates this size is
466 also commonly used for envelopes. It does not imply that this size is only available as an envelope
467 media type.”
468 10. Merged envelope sizes into the corresponding sheet sizes tables. The string “envelope” has been
469 removed from all envelope size names.
470 11. Added “government-legal” to Table 3.
471 12. Added “juuro-ku-kai”, “pa-kai”, and “dai-pa_kai” to Table 6.
472 13. Removed “IANA Considerations” section.
473

474 **15.4 Changes to D.03, February 22, 2001, to make D.04, March 21, 2001**

475 The following changes were made:

- 476
- 477 1. Added more Terminology
 - 478 2. Added Media Type Names
 - 479 3. Added Media Color Names
 - 480 4. Used ABNF to define the syntax for Media Size Self Describing Names
