

# **PWG WIMS & *CIM* Alignment Conference Call May 24, 2007**

## **Attendees**

Lee Farrell	Canon
Rick Landau	Dell
Harry Lewis	IBM
Ira McDonald	High North
Glen Petrie	Epson
Bill Wagner	TIC
Craig Whittle	Sharp
Pete Zehler	Xerox

## **General Discussion**

- Call Started at 12PM EST
- Minutes of the 10 May Conference Call were accepted

## **Imaging System State and Counter MIB Document**

There had been no comments in response to Ira's proposed approach to the Imaging System State and Counter MIB document beyond Walt's agreement, so Ira will rework the Imaging Counter MIB Document into the Imaging System State and Counter MIB document accordingly. The change will also reflect the approved change to the "Counter specification" as well.

## **CIM Efforts**

- Rick discussed the updated Printer Components diagrams ([ftp://ftp.pwg.org/pub/pwg/wims/cim/Visio-Printer\\_06.pdf](ftp://ftp.pwg.org/pub/pwg/wims/cim/Visio-Printer_06.pdf)) It was decided to handle the PrintConsoleDisplayBuffer as an array of strings under the Printer class, rather than as a class itself. Presumably, number of lines and number of characters would be given. This will necessitate further changes to the diagrams.
- Rick discussed the updated Print Class Groupings ([ftp://ftp.pwg.org/pub/pwg/wims/cim/td\\_PrintClassGroupings\\_v10\\_20070517.xls](ftp://ftp.pwg.org/pub/pwg/wims/cim/td_PrintClassGroupings_v10_20070517.xls))
  - For the Console the Row ID (SNMPRowId) must be retained.
  - The tables need to be further updated for associations
  - For prtChannel, state and status ro the same and will be consolidated. Aux information is not implemented in a consistent manner and will be dropped. The necessary

information will be provided by eventually mapping the PortMonMIB.

- For prtMarker, the addressability unit will be removed and a fixed addressability unit of dots/inch will be used
- For prtAlert, the time element will be covered by the date-time stamp

### **Next Steps / Open Actions:**

- Rick will update the figures and PrintClassGroupings
- Ira will post update to Imaging System State and Counter MIB document
- Rick and Ira will continue to produce and modify MOFs for submission to CIM core.
- Next WIMS CIM teleconference will be on Thursday 7 June at 12Noon EDT
  - Dial In: 1-866-365-4406
  - Toll #: 1-303-248-9655
  - Passcode: 2635888#

WAW 4 June 2007
