PWG WIMS _CIM Alignment_
Conference Call Minutes
March 23, 2005

Craig Whittle – PWG WIMS/CIM Co-chair

Meeting was called to order at approximately 2 p.m. EDT March 23, 2006 by Bill Wagner.

Attendees

Bill Wagner	TIC
Ira McDonald	High North
Rick Landau	Dell
Craig Whittle	Sharp
Harry Lewis	IBM
Pete Zehler	Xerox

General Discussion

- Minutes from the March 16th teleconference were accepted.

- The Call for Objections process was reviewed as stated in the PWG process document. The "clarification" path, although liberally interpreted, will be used.

  o Bill to send out on PWG-Announce this afternoon the "Call for Objections" for the white paper and CR which will end at the April face-to-face.

- Next steps:

  o New version of white paper to be submitted by Ira for additional changes to the CIM printing classes.

  o Separate CRs should be written for each class requiring "non-trivial" changes. Trivial changes (small one or two line changes) can be combined into a single CR.

  o Order: Print Service, Print Job, and Print Queue

  o Every property should have mapping stings and model correspondence (reference to parent property)

- CIM Core changes (feedback from CR) will be incorporated back into Ira's white paper.

- White paper with all CIM Core changes will become a PWG formal informational document (with approval).

- Final white paper will have link to CRs on the DMTF site (requires membership). CR approval statement will be included in the white paper.

- Rick has joined the CIM Core working group. As part of the alliance between DMTF and CIM core, the PWG can select a non-voting member to participate (including the weekly 9 a.m. teleconference on Fridays).

  o Craig will participate in the phone calls that have explicit agenda items pertaining to the CR/whitepaper/alliance.

Next Steps / Open Actions:

- Bill to send out on PWG-Announce this afternoon the "Call for Objections" for the white paper and CR which will end at the April face-to-face.

- Work to begin on additional classes (separate CRs) soon. Print service is next followed by queue and job. All of Phase I to be completed before Phase II.

- Next teleconference is scheduled for 3/30/06.
